

MOODY'S KMV FINANCIAL ANALYST™ VERSION 5.0

MINIMUM HARDWARE AND SOFTWARE REQUIREMENTS

STANDALONE INSTALLATION

- Intel Pentium 233MHz or faster
- Minimum 64MB RAM
- Minimum 65MB free hard disk space for program files
- MDAC 2.51, 2.6 or 2.7 (Included on the Installation CD)
- Internet Explorer 5.0 or higher (Internet Explorer 5.01 is included on the Installation CD)
- Microsoft Windows 98*/2000/NT Workstation 4.0, SP4 or higher /XP
- The client must fully support Windows 32-bit application features, including long filenames
- Floppy diskette drive required for installation of copy-protected version of Moody's KMV Financial Analyst

NETWORK INSTALLATION USING MICROSOFT SQL SERVER 7.0

Database Server

- Intel Pentium 233MHz or faster
- Free storage space depends on database size (Microsoft Excel sizing worksheets are available in the corresponding database directory on the CD)
- Microsoft SQL Server Enterprise Edition Version 7.0 with case insensitive sort order (refer to Microsoft documentation for system requirements relative to SQL Server 7.0 software)

File Server

- Intel Pentium 233MHz or faster
- Minimum 50 MB free hard disk space for program files
- Microsoft Windows 2000, 2003 Server, NT Server 4.0, NT Server 4.0 Enterprise Edition, Windows XP, or Novell NetWare 3.12 or higher
- The server must fully support 32-bit application features, including long filenames

Workstation

- Intel Pentium 233MHz or faster
- Minimum 64MB RAM
- Minimum 20 MB free hard disk space for workstation files
- MDAC 2.51, 2.6 or 2.7 (Included on the Installation CD)
- Internet Explorer 5.0 or higher (Internet Explorer 5.01 is included on the Installation CD)
- Microsoft Windows 98*/2000/NT Workstation 4.0, SP4 or higher /XP
- The client must fully support Windows 32-bit application features, including long filenames
- Microsoft SQL Server Version 7.0 Client Connectivity components
- Floppy diskette drive required for installation of copy-protected version of Moody's KMV Financial Analyst

NETWORK INSTALLATION USING MICROSOFT SQL SERVER 2000

Database Server

- Intel Pentium 233MHz or faster
- Free storage space depends on database size (Microsoft Excel sizing worksheets are available in the corresponding database directory on the CD)
- Microsoft SQL Server 2000 Enterprise Edition with case insensitive sort order for the database (refer to Microsoft documentation for system requirements relative to SQL Server 2000 software)

File Server

- Intel Pentium 233MHz or faster
- Minimum 50 MB free hard disk space for program files
- Microsoft Windows 2000, 2003 Server, NT Server 4.0, NT Server 4.0 Enterprise Edition, Windows XP, or Novell NetWare 3.12 or higher
- The server must fully support 32-bit application features, including long filenames

Workstation

- Intel Pentium 233MHz or faster
- Minimum 64MB RAM
- Minimum 20 MB free hard disk space for workstation files
- MDAC 2.51, 2.6 or 2.7 (Included on the Installation CD)
- Internet Explorer 5.0 or higher (Internet Explorer 5.01 is included on the Installation CD)
- Microsoft Windows 98*/2000/NT Workstation 4.0, SP4 or higher /XP
- The client must fully support Windows 32-bit application features, including long filenames
- Microsoft SQL Server Version 2000 Client Connectivity components
- Floppy diskette drive required for installation of copy-protected version of Moody's KMV Financial Analyst

NETWORK INSTALLATION USING ORACLE 8.1.7, 9.2

Database Server

- Intel Pentium 233MHz or faster
- Free storage space depends on database size (Microsoft Excel sizing worksheets are available in the corresponding database directory on the CD)
- Oracle Enterprise Edition Version server software (refer to Oracle documentation for system requirements relative to Oracle Server software)

File Server

- Intel Pentium 233MHz or faster
- Minimum 50 MB free hard disk space for program files
- Microsoft Windows 2000, 2003 Server, NT Server 4.0, NT Server 4.0 Enterprise Edition, Windows XP, or Novell NetWare 3.12 or higher
- The server must fully support 32-bit application features, including long filenames

Workstation

- Intel Pentium 233MHz or faster
- Minimum 64MB RAM
- Minimum 20 MB free hard disk space for workstation files
- MDAC 2.51, 2.6 or 2.7 (Included on the Installation CD)
- Internet Explorer 5.0 or higher (Internet Explorer 5.01 is included on the Installation CD)
- Microsoft Windows 98*/2000/NT Workstation 4.0, SP4 or higher /XP.
- The client must fully support Windows 32-bit application features, including long filenames
- Oracle Client Connectivity components**
- Floppy diskette drive required for installation of copy-protected version of Moody's KMV Financial Analyst

NETWORK INSTALLATION USING ADAPTIVE SERVER ANYWHERE***

Database Server

- Intel Pentium 233MHz or faster
- Minimum of 8MB RAM for Adaptive Server Anywhere software
- Minimum 15 MB hard disk space for Adaptive Server Anywhere software
- Free storage space depends on amount of data (i.e., number of customers, number of statements, statements per customer, number of projection scenarios per customer, etc.).
 - As a benchmark, a database with 100 customers, each with an average of 5 statements, 2 long term projection scenarios, 2 short term projection scenarios, 5 Notes (with 300 alphacharacters), 8 user-defined analyses and 8 relabeled accounts is 29 MB
 - Use this as an estimate for the amount of storage required. An empty Adaptive Server Anywhere database requires 6 MB
- Microsoft Windows 2000/NT Server 4.0

File Server

- Intel Pentium 233MHz or faster
- Minimum 50 MB free hard disk space for program files
- Microsoft Windows 2000, 2003 Server, NT Server 4.0, NT Server 4.0 Enterprise Edition, Windows XP, or Novell NetWare 3.12 or higher
- The server must fully support 32-bit application features, including long filenames

Workstation

- Intel Pentium 233MHz or faster
- Minimum 32MB RAM
- Minimum 20MB free hard disk space for workstation files
- MDAC 2.51, 2.6 or 2.7 (Included on the Installation CD)
- Internet Explorer 5.0 or higher (Internet Explorer 5.01 is included on the Installation CD)
- Microsoft Windows 98*/2000/NT Workstation 4.0, SP4 or higher/XP
- The client must fully support Windows 32-bit application features, including long filenames
- Floppy diskette drive required for installation of copy-protected version of Moody's KVM Financial Analyst

* If using Windows 98, you may not be able to select a large number of customers for batch processing (i.e., Update Portfolio). In order to batch process all customers, you may be required to divide the customers into smaller batches before processing.

** If using the Oracle OLEDB Provider driver to connect to an Oracle 8.1.7 database, you must use version 8.1.7 or higher. With earlier versions, problems may occur when opening customers.

*** The Adaptive Server Anywhere software is provided when licensing Moody's KVM Financial Analyst for use with Adaptive Server Anywhere. The version of Adaptive Server Anywhere provided is 7.04. We do not support Adaptive Server Anywhere running on the same server machine as Pervasive SQL. In general, we advise against running more than one database server on a server machine.
